

Assignment IV (CBSE Class 9 Probability)

Kola Akshitha

Example 7: The percentage of marks obtained by a student in the monthly unit tests are given below:
Based on this data find the probability that the student gets more than 70% marks in a unit test.

Unit test	<i>I</i>	<i>II</i>	<i>III</i>	<i>IV</i>	<i>V</i>
Percentage of marks obtained	69	71	73	68	74

TABLE I

Solution:

Total number of unit tests conducted is 5.

The number of unit tests in which the student scored more than 70% is 3

$\therefore \text{Pr}(\text{scoring greater than 70\% marks}) = \frac{3}{5} = 0.6$
